Platinum Group

The Platinum Group is a collection of 125 like-minded, technically trained individuals. These are the first individuals trained in Generative AI after going through the Generative AI for Solopreneurs program. These individuals will be extended special privileges and benefits.

These benefits and privileges will ideally be tailored to the specific interests and professional goals of the group members, enhancing both their individual and collective expertise in Generative AI. This group is extremely limited in its membership. Only 125 individuals will ever be allowed to join at this level. While membership benefits will never carry an internal cost, there will be a nominal yearly subscription fee whose intent will be to ensure compliance and ongoing interest. Members will be billed the subscription fee at the first of the year and will be allowed 30 days from the date of billing to pay said membership fees. Billing will commence on the first of the year in January and continue each week for 4 weeks or until such fees are paid or the member defaults. Once a default is recorded, the member in default will not be allowed to cure said default. This is solely for the purpose of consolidation of membership influence.

Please note that Aseeum Computer Technologies LLC reserves the right to modify, change, or discontinue any aspect of these benefits at any time. The privileges and benefits outlined above and below are subject to the company's final decision and may be adjusted or updated based on evolving needs and circumstances. This list should be viewed as a starting point and may not represent all potential offerings available to members.

Initial Benefits 2024

The benefits that you see listed below is the initial benefits list for the Platinum Group. This list is by no means a complete listing but rather a beginning.

- Advanced Training and Workshops: Provides exclusive access to advanced courses, workshops, and webinars that delve deeper into specific aspects of Generative AI. This could include emerging technologies, industry-specific applications, or hands-on project work.

- Networking Opportunities: Facilitate networking events with industry leaders, AI experts, and potential clients or collaborators. This could be in the form of exclusive meetups, conferences, or online forums.

- Access to Cutting-Edge Tools: Offer early or exclusive access to new software, tools, or platforms in the field of Generative AI. This could also include beta testing opportunities where you can provide feedback and influence development.

- Collaboration and Project Opportunities: Connecting members with real-world projects or collaborations, either within the group or with external partners, to apply your skills in practical scenarios.

- Mentorship Programs: Pair members with mentors in Generative AI for personalized guidance and career development.

- Research and Publication Opportunities: Encourage and support members to conduct research in Generative AI and provide platforms for them to publish or present their findings.

- Exclusive Content and Resources: Provide access to a curated library of resources, such as research papers, case studies, and exclusive articles relevant to Generative AI.

- Discounts on Tools and Conferences: Negotiate discounts for group members on popular AI tools, software subscriptions, and tickets to relevant conferences or workshops.

- Certification and Recognition: Offer certification for completing the advanced programs and recognize outstanding achievements or contributions within the group.

- Career Support: Provide career services such as resume reviews, job postings, or interview preparation, especially focusing on opportunities in the field of Generative AI.

Zero-Shot Group

The Zero-shot Group will be a subscription based members only group for those that wish to extend their educational experience in Internet Marketing AI. These individuals will have access to the small business opportunities counsel, and the Internet Marketing AI Library.

These benefits will be tailored to the specific interests and goals of the group's members, ensuring that they receive focused materials and insights that can be directly applied to their work in internet marketing AI as well as with their clients. Members will be billed a subscription fee at the first of the month and will be allowed 30 days from the date of billing to pay said membership fees. Billing will commence on the first day of the month and continue each week for 4 weeks or until such fees are paid or the member defaults. Once a default is recorded, the member in default will be allowed to cure said default at members discretion.

Please note that Aseeum Computer Technologies LLC reserves the right to modify, change, or discontinue any aspect of these benefits at any time. The privileges and benefits outlined above and below are subject to the company's final decision and may be adjusted or updated based on evolving needs and circumstances. This list should be viewed as a starting point and may not represent all potential offerings available to members.

Initial Benefits 2024

The benefits that you see listed below is the initial benefits list for the Zero-shot Group. This list is by no means a complete listing but rather a beginning.

- Exclusive Access to AI Marketing Tools: Provide members with access to advanced AI tools and software specific to internet marketing. This could include analytics platforms, content creation tools, and AI-driven marketing automation software.

- Tailored Learning Content: Create a bespoke curriculum or learning modules that cater specifically to the latest trends and techniques in AI-driven internet marketing.

- Expert Webinars and Workshops: Host regular webinars and workshops led by industry experts in internet marketing and AI. These sessions could cover topics like AI in social media marketing, SEO, content creation, and data analysis.

- Networking Opportunities with Industry Leaders: Facilitate networking events (both virtual and in-person) where members can connect with seasoned professionals, potential clients, or collaborators in the internet marketing and Generative AI field.

- Access to the Internet Marketing AI Library: Ensure the library is stocked with the latest resources, case studies, research papers, and e-books related to AI in marketing.

- Consultation with the Small Business Opportunities Counsel: Offer personalized advice or consultations with the "Platinum" counsel to assist members in applying AI strategies to their business or marketing plans.

- Collaboration and Project Opportunities: Provide opportunities for members to work on real-world projects, either within the group or through external partnerships, to apply their knowledge in practical scenarios.

- Certification Programs: Offer certifications for various courses or learning paths completed within the group, adding value to their professional profiles.

- AI Tool Discounts and Offers: Negotiate special deals or discounts for members on popular internet marketing and AI tools or software subscriptions.

- Members-Only Online Discord Forum: Create an exclusive online community for members to share insights, ask questions, and collaborate on ideas and projects.

- Career and Business Development Support: Offer services like business plan reviews, marketing strategy sessions, or even job placement assistance for those looking to advance their careers in AI-driven internet marketing.

- Regular Industry Updates and Newsletters: Keep members informed with a regular newsletter featuring the latest trends, case studies, and news in the realm of AI and internet marketing.

Aseeum AI Group Dynamics

This policy outlines the expected behavior and conduct of members within our groups, ensuring a professional, supportive, and ethical environment. Adherence to these guidelines is mandatory for all members participating in group meetings, classes, seminars, and any other group-related activities.

1. Professional Conduct:

- Respect and Professionalism: Members are expected to maintain a high level of respect and professionalism towards each other at all times. This includes respectful communication, punctuality for meetings and events, and a professional demeanor.

- Confidentiality: Respect the confidentiality of information shared within the group. Sensitive information discussed in meetings or seminars should not be disclosed outside the group without explicit permission.

- Conflict Resolution: Any conflicts among members should be resolved in a constructive and professional manner. The group encourages open communication and the seeking of amicable solutions.

2. Empathy and Support

- Fostering a Supportive Environment: Members should strive to create an environment that is welcoming, inclusive, and supportive. This involves being open to diverse perspectives and experiences.

- Assistance and Collaboration: Members are encouraged to assist each other in learning and project development. Offer help, share knowledge, and collaborate in a spirit of kindness and cooperation.

- Feedback and Encouragement: Constructive feedback should be given with empathy and a positive intent. Celebrate the successes of fellow members and provide encouragement during challenges.

3. Ethical and Responsible AI Development

- Adherence to Standards: Members must adhere to established standards and best practices in AI development. This includes being up-to-date with the latest guidelines and methodologies in ethical AI.

- Promoting Responsible AI: Encourage and support the development of AI solutions that are fair, transparent, and beneficial for society. Avoid any practices that could harm individuals or groups.

- Continuous Learning: Stay informed about the evolving ethical implications of AI. Engage in continuous learning to understand the impact of AI technologies on society and the environment.

4. Accountability and Enforcement

- Reporting Mechanisms: Members should report any violations of this policy to the appropriate committee or authority within the group. All reports will be handled with confidentiality and professionalism.

- Consequences of Violations: Violations of these guidelines may result in a review of the member's status in the group, which could lead to sanctions or removal from the group if deemed necessary.

5. Conclusion

- Adherence to these guidelines will foster a positive, ethical, and collaborative environment for all members, facilitating personal and professional growth within the field of AI. We are committed to upholding these standards to ensure our group remains a respected and valuable community for all its members.
